

CSR

Corporate Social Responsibility (CSR) is the standard for entrepreneurial activity in the 21st century. It is about making a conscious choice in order to reach an acceptable balance between People, Planet & Profit.

Our aim is to be honest, fair and reliable towards our staff, our customers, our suppliers and our society.

We seek to do business in a responsible and ethical manner, ensuring that our activities have no detrimental effect on the environment or on the society we live in. We also pledge to create and sustain a pleasant, safe and healthy working environment for all employees.

We set the highest standards for reliability and integrity and expect this to be adopted by our staff, our suppliers and all sub-contractors, at all times.
